ABOUT THE CONFERENCE

BARICON 2026

A meeting of knowledge, skill and shared purpose.

BARICON 2026, the 4th International Conference on Bariatric & Metabolic Surgery, brings together surgeons, physicians, allied health professionals and trainees for an exchange of clinical experience, scientific ideas and practical learning.

The meeting begins with a cadaveric course at AIIMS, New Delhi, on 24 September. The scientific programme follows on 25-26 September at Taj Vivanta, Dwarka, bringing national and international faculty together through keynote lectures, debates, panel discussions, video presentations and workshops.

The programme explores Metabolic and Bariatric Surgery, revision and conversional procedures, obesity-modifying medications, robotics and artificial intelligence. Dedicated allied health sessions connect surgical practice with nutrition, metabolic health and long-term patient support.

01

KNOWLEDGE

Explore current evidence and diverse perspectives through expert-led scientific discussions.

02

SKILL

Connect operative techniques and practical insights with everyday clinical questions.

03

COLLABORATION

Build connections across specialties, institutions and stages of professional development.

Three days. One shared purpose.

Learning, dialogue and lasting
professional connections.

FROM THE ORGANISING CHAIRPERSON

Welcome to BARICON 2026

Dear Colleagues and Friends,

On behalf of the Organising Committee, it gives me great pleasure to welcome you to BARICON 2026, the 4th International Conference on Bariatric & Metabolic Surgery, in New Delhi.

This year's theme, "**Precision Obesity Medicine: Tailoring Surgery, Drugs and Digital Tools,**" reflects the evolving landscape of obesity care and the importance of treatment tailored to each individual. BARICON provides an opportunity to explore how surgery, obesity medications and digital technologies can complement one another in clinical practice, while sharing experience and learning together.

Dr Sandeep Aggarwal
Organising Chairperson

From the cadaveric course at AIIMS on 24th September to the scientific sessions at Taj Vivanta on 25th-26th September, we have brought together national and international faculty for a programme of lectures, debates, videos and practical discussions. Alongside surgical advances, the programme embraces nutrition, obesity medicine, robotics and artificial intelligence.

We especially look forward to the participation of allied health professionals and young colleagues. Their perspectives are essential to a multidisciplinary approach to obesity care and to the future of our specialty.

I sincerely thank our faculty, delegates, organising team and supporting partners for their contributions. May these three days inspire thoughtful discussion, practical learning and lasting collaborations.

I look forward to welcoming you to New Delhi and sharing a memorable BARICON 2026 with you.

With warm regards,

Dr Sandeep Aggarwal

Organising Chairperson
BARICON 2026
